

## HIGH PRESSURE RELIABILITY. NASON FLEXIBILITY.

Nason's goal is to always have a switch that meets your exact needs. And now, our CD high pressure switch lets you adjust the set-point in the field. The CD is a high quality snap action switch in a compact, space-efficient design. In both low and high pressure ranges it will reliably deliver literally millions of cycles. And Nason pricing will keep the pressure off your design budget, too.

Visit [www.nasonptc.com](http://www.nasonptc.com) to review operating specifications of the model CD. Call 800.229.4955 or email [nassales@nasonptc.com](mailto:nassales@nasonptc.com) for more information and to request a free custom sample.
