

## **THIS IS EXACTLY WHAT YOU GET. UNLESS YOU WANT TO CHANGE IT.**

You've always been able to customize the configuration of Nason switches. And now our CJ low pressure switch lets you adjust the set-point in the field. Like everything else Nason makes, our CJ switch has a compact, space-efficient design. It's reliable for a million cycles and more. And while you'd expect to pay more for this combination of size, flexibility and performance, you won't.

**Visit [www.nasonptc.com](http://www.nasonptc.com) to review operating specifications of the model CJ. Call 800.229.4955 or email [nassales@nasonptc.com](mailto:nassales@nasonptc.com) for more information and to request a free custom sample.**
